

AHMAD HELAL

ERP & Data Analyst

A developer/ Data analyst having high passion for the data analysis and ERP fields with work experience in data analysis, Odoo development and machine learning models. I'm excited to apply my passion and experience to the collaborative efforts of a team focused on insightful, high-quality development, data analytics and ERP applications.

Education

University of Nottingham

Master in Engineering in Civil Engineering

September 2013 - May 2018

Malaysia

Skills

- Odoo Development
- Python (Numpy, Pandas, Matplotlib, etc..)
- Machine Learning (Supervised & Unsupervised learning models, Neural Networks)
- Tableau
- SQL databases and queries.
- HTML & CSS & JavaScript
- PHP

Certifications

- Open Data / ML Internship Program by Fixed Solutions CO.
- Machine Learning Specialization by Stanford and DeepLearning.AI (Supervised : Regression and Classification,) _ (Advanced Learning Algorithms: Neural Networks, Random Forest) _ (Unsupervised, Recommenders, and Reinforcement Learning)
- EGYPTFWD Data Analysis Professional Nanodegree
- Kaggle Machine Learning Course
- Computer Science-CS101 by Stanford university
- Database Fundamentals by (Maharatech Institute)
- Data Analysis- Web Development- Digital Marketing (Challenger Track) from Udacity

Project Samples

Alsafaa Hospital Management System

Build HMS System for Al safaa Clinic

- Developed and customized a Hospital Management System (HMS) module integrated with Odoo for managing Alsafaa clinic operations.
- Implemented features for patient appointments, surgeries, medical supplies, and hospital services management.
- Configured and deployed the HMS solution based on hospital workflow requirements.
- Trained hospital staff and employees on system usage and daily operations to ensure smooth adoption.

Open AI Chatbot with odoo's database

Building Open AI chatbot integrated with Odoo's database.

- Built a chatbot to answer user queries specifically for odoo's database instance using Open AI APIs and Langchain library.
- The application receives user question, chooses the relevant tables to query, produces the sql query, then the query runs on the database and natural response is returned to the user.

E-Commerce website

Dynamic website for selling scented candles

<https://incandescent.wuaze.com>

- Full website built using HTML, CSS, JavaScript, PHP, and MySQL. starting with an online front-end template.
- The database MySQL server is used to store orders, products, messages, and user credentials.
- Website was built to have admin interface for the admins and user interface for customers.

Customer Personality

Analysis and segmentation of Customers

- KAnalyze the company's customers behaviors (using pandas & Numpy), to modify products according to the specific needs and behaviors of different types of customers.
- Categorized customers into 4 different segments based on different features using various statistical methods and clustering machine learning models (e.g. K_Means, DBSCAN, K_Prototype) to find the best possible segmentation of customers.

Ford-Go Bikeshare

Business and Customers Analysis

- Implemented analysis of the bikeshare data using Python(Numpy and Pandas) and visualized the relations on graphs using seaborn and matplotlib libraries to recommend actions for better exploitation of the bikes
- Implemented Datawig machine learning model for missing value imputation on the dataset on both numerical and categorical dataset.
- Visualization of the summarized analysis of bikeshare data on an interactive dashboard using Tableau. This included presenting the location of stations, count of trips and distance covered using different filters for further exploration.

[My Portfolio](#)

Work Experience

Arab Security | Odoo Developer

May 2024- Present

- Develop new Odoo modules or enhance existing ones to meet business requirements.
- Built a chatbot application to integrate with Odoo;s PostgreSQL to answer user questions using Open AI and LangChain.
- Integrate Odoo with other third-party systems (e.g., payment gateways, Open AI, Whats App).
- Experience in integrating Odoo with external services (REST APIs).
- Knowledge of DevOps tools (e.g., Docker)
- Work with PostgreSQL databases, creating and optimizing complex SQL queries.
- Configure Odoo instances and handle upgrades and migrations across different versions of Odoo.

Freelancer | Data analysis and ERP softwares

April 2023 - April 2024

- Implementing and testing **Camunda** for workflow automation and building test automated workflows
- Implementing machine learning models for different applications e.g. Chatbot
- Build E-commerce for selling candles using MySQL and PHP.
- Data collection using webscraping libraries from websites.

Fixed Solutions | Data Scientist Trainee

November 2022 - March 2023

- Preliminary processing, cleansing, analysis, and visualization of data to gain insights and drive recommendations that would help in business decision-making.
- Implementing machine learning models for 3 different applications which include predicting customers income, missing values imputation, and customers segmentation.
- Presenting analysis results and recommendations to top team leaders and members.

Alexandria Construction Company(ACC) | Technical Office Engineer

December 2021 - September 2022

- Monthly BOQ and invoices calculation taking into consideration inflation factors (Utilities Department).
- Producing shop drawings for the utilities networks (Sewerage, Storm, Water, & irrigation networks).

Arc For Trading & Construction | Technical Office Engineer

December 2022 - September 2023

- Reviewal of architectural and structural drawings using CAD &
- monitoring construction work on site.
- Carrying surveying works on site using the level and staff.
- Monitored the rehabilitation of an office building using a steel structure

- **Military Service | July 2019 - August 2020**
